

Arctic Coolers is Proud to Supply the finest quality filtered drinking water through our state of the art

Arctic UltraPure

The UltraPure has a 5 stage water purification system that contains an ultraviolet light that kills airborne bacteria and viruses. This provides more than ten times finer filtration than bottled water.

Filtration Stages	
1. Sediment Pre-Filter	Removes Suspended Particles Reduces Particles as Small as 5 Microns (.0002 in.)
2. Carbon Pre-Filter	Removes Chlorine and Organic Chemicals
3. Membrane	Removes Bacteria, Viruses, and Minute Particles
4. Post Carbon	Removes Off Taste, Odor, Organic Contaminants Polishes the Taste
5. Ultraviolet Process	Destroys Reproductive Capabilities, Bacteria, & Viruses
